CONTENTS OF VOLUME 46

NUMBER 1, SEPTEMBER, 1962

1 CLOSE, R. The pattern of activation in the sartorius muscle of the frog

19 BARR, LLOYD, HEADINGS, VERLE E., and BOHR, DAVID F. Potassium and the recovery of arterial smooth muscle after cold storage

35 VAN DER KLOOT, WILLIAM G., and RUBIN, NIRA S. Contraction and action potentials of frog heart muscles soaked in sucrose solution

57 LONDON, MORRIS, MCHUGH, ROSEMARY, and HUDSON, PERRY B. Unified theory of enzyme catalysis and denaturation. II. Some effects of anions on prostatic acid phosphatase behavior

75 DEVOE, ROBERT D. Linear superposition of retinal action potentials to predict electrical flicker responses from the eye of the wolf spider, *Lycosa baltimoriana* (Keyserling)

97 NAKAJIMA, SHIGEHIRO, IWASAKI, SHIZUKO, and OBATA, KUNIHIKO. Delayed rectification and anomalous rectification in frog's skeletal muscle membrane

117 WHITTEMBURY, GUILLERMO. Action of antidiuretic hormone on the equivalent pore radius at both surfaces of the epithelium of the isolated toad skin

131 KAMINER, BENJAMIN. Water loss during contracture of muscle

143 EGUCHI, EISUKE, NAKA, KÉN-ICHI, and KUWABARA, MASUTARO. The development of the rhabdom and the appearance of the electrical response in the insect eye

159 SCHULTZ, STANLEY G., WILSON, NORMAN L., and EPSTEIN, WOLFGANG. Cation transport in *Escherichia coli*. II. Intracellular chloride concentration

167 NASH, T. The chemical constitution of compounds which protect erythrocytes against freezing damage

NUMBER 2, NOVEMBER, 1962

177 BACHOFER, C. S., and WITTRY, S. ESPERANCE. Comparison of stimulus energies required to elicit the ERG in response to x-rays and to light

189 PAGE, ERNEST. Cat heart muscle *in vitro*. II. The steady-state resting potential in quiescent papillary muscles

201 PAGE, ERNEST. Cat heart muscle *in vitro*. III. The extracellular space

215 COHEN, WILLIAM D., SCHNEEBAUM, JEANNE, and HAYASHI, TERU. Adenosine diphosphate requirement in the creatine phosphate–induced contraction of the glycerinated rabbit psoas

225 MARTIN, K., and BURGEN, A. S. V. Changes in the permeability of the salivary gland caused by sympathetic stimulation and by catecholamines

Alma College Library
Alma, Michigan

245 VILLEGAS, RAIMUNDO, CAPUTO, CARLO, and VILLEGAS, LEOPOLDO. Diffusion barriers in the squid nerve fiber. The axolemma and the Schwann layer
257 GUTTMAN, RITA. Effect of temperature on the potential and current thresholds of axon membrane
267 UNGAR, GEORGES, and ROMANO, DOMINICK V. Fluorescence changes in nerve induced by stimulation. Their relation to protein configuration
277 GOSSELIN, R. E., MOORE, K. E., and MILTON, A. S. Physiological control of molluscan gill cilia by 5-hydroxytryptamine
297 JULIAN, FRED J., and GOLDMAN, DAVID E. The effects of mechanical stimulation on some electrical properties of axons
315 HURWITZ, LEON, BATTLE, FRANK, and WEISS, GEORGE B. Action of the calcium antagonists cocaine and ethanol on contraction and potassium efflux of smooth muscle
333 SELIGER, HOWARD H. Direct action of light in naturally pigmented muscle fibers. I. Action spectrum for contraction in eel iris sphincter
343 SCHULTZ, STANLEY G., EPSTEIN, WOLFGANG, and GOLDSTEIN, DAVID A. Cation transport in *Escherichia coli*. III. Potassium fluxes in the steady-state
357A ABSTRACTS OF PAPERS PRESENTED AT THE SEVENTEENTH ANNUAL MEETING OF THE SOCIETY OF GENERAL PHYSIOLOGISTS

NUMBER 3, JANUARY, 1963

369 JACKSON, P. C., and ADAMS, H. R. Cation-anion balance during potassium and sodium absorption by barley roots
387 SWENSON, PAUL A., and BETTS, ROBERT F. Aerobic fermentation and the depletion of the amino acid pool in yeast cells
405 FRANKS, J. J. Calculation of the albumin catabolic rate in the non-steady-state
415 FRANKS, J. J., MOSSER, E. L., and ANSTADT, GEORGE L. The role of the gut in albumin catabolism. I. Studies in the jejunoileectomized rabbit
427 FRANKS, J. J., EDWARDS, KENNETH W., LACKEY, WILLIAM W., and FITZGERALD, JOHN B. The role of the gut in albumin catabolism. II. Studies in enterectomized rabbits
435 FUORTES, M. G. F., and POGGIO, G. F. Transient responses to sudden illumination in cells of the eye of *Limulus*
453 TUCKER, DON. Physical variables in the olfactory stimulation process
491 FRAZIER, HOWARD S., and LEAF, ALEXANDER. The electrical characteristics of active sodium transport in the toad bladder
505 ESSIG, ALVIN, and LEAF, ALEXANDER. The role of potassium in active transport of sodium by the toad bladder
517 WERMAN, ROBERT. Electrical inexcitability of the frog neuromuscular synapse
533 TAUC, L., and HUGHES, G. M. Modes of initiation and propagation of spikes in the branching axons of molluscan central neurons

551 KENNEDY, DONALD. Physiology of photoreceptor neurons in the abdominal nerve cord of the crayfish
573 ECKERT, ROGER. Electrical interaction of paired ganglion cells in the leech
589 VAN VUNAKIS, HELEN, LEHRER, HARRIS I., ALLISON, WILLIAM S., and LEVINE, LAWRENCE. Immunochemical studies on the components of the pepsinogen system
605 BLOCH, RENÉ, WALTERS, D. H., and KUHN, WERNER. Structurally caused freezing point depression of biological tissues
617 LANG, CALVIN A. The accumulation of zinc by the mosquito

NUMBER 4, MARCH, 1963

629 MULLINS, L. J., and FRUMENTO, A. S. The concentration dependence of sodium efflux from muscle
655 ISAACSON, ALLEN, and SANDOW, ALEXANDER. Effects of zinc on responses of skeletal muscle
679 WEBER, ANNEMARIE, HERZ, RUTH, and REISS, INGRID. On the mechanism of the relaxing effect of fragmented sarcoplasmic reticulum
703 LANGER, G. A., and BRADY, A. J. Calcium flux in the mammalian ventricular myocardium
721 LEFEVRE, PAUL G. Absence of rapid exchange component in a low-affinity carrier transport
733 MAFFLY, ROY H., and EDELMAN, I. S. The coupling of the short-circuit current to metabolism in the urinary bladder of the toad
755 TASAKI, ICHIJI. Permeability of squid axon membrane to various ions
773 WATANABE, AKIRA, and TAKEDA, KIMIHISA. The spread of excitation among neurons in the heart ganglion of the stomatopod, *Squilla oratoria*
803 MCCANN, FRANCES V. Electrophysiology of an insect heart
823 FULTON, CHANDLER. Proline control of the feeding reaction of *Cordylophora*
839 ILANI, A. K-Na discrimination by porous filters saturated with organic solvents as expressed by diffusion potentials

NUMBER 5, MAY, 1963

851 CARLSON, FRANCIS D., HARDY, DONNA J., and WILKIE, DOUGLAS R. Total energy production and phosphocreatine hydrolysis in the isotonic twitch
883 BRIGGS, F. NORMAN, and FUCHS, FRANKLIN. The nature of the muscle-relaxing factor. I. An improved assay system
893 FUCHS, FRANKLIN, and BRIGGS, F. NORMAN. The nature of the muscle-relaxing factor. II. Some physicochemical properties
905 JÖBSSI, FRANS F. Spectrophotometric studies on intact muscle. I. Components of the respiratory chain
929 JÖBSIS, FRANS F. Spectrophotometric studies on intact muscle. II. Recovery from contractile activity
971 NORTHROP, JOHN H. Studies of the origin of bacterial viruses. VII. The effect

of various mutagens (urethane, ethyl urethane, hydrogen peroxide, desoxycholate, maleic hydrazide, butadiene dioxide, triethylene melamine, versene, and acriflavine) on the proportion of virus-producing and streptomycin-resistant cells in cultures of *B. megatherium* 20 Δ

983 DAVIDSON, E. H. Heritability and control of differentiated function in cultured cells

999 HERRERA, FRANCISCO C., and CURRAN, PETER F. The effect of Ca and antidiuretic hormone on Na transport across frog skin. I. Examination of interrelationships between Ca and hormone

1011 CURRAN, PETER F., HERRERA, FRANCISCO C., and FLANIGAN, WILLIAM J. The effect of Ca and antidiuretic hormone on Na transport across frog skin. II. Sites and mechanisms of action

1029 CHURNEY, LEON, and OHSHIMA, HISASHI. Is the fundamental electrical response of the single heart muscle cell a spike potential?

1047 VILLEGAS, RAIMUNDO, VILLEGAS, LEOPOLDO, GIMÉNEZ, MÁXIMO, and VILLEGAS, GLORIA M. Schwann cell and axon electrical potential differences. Squid nerve structure and excitable membrane location

1065 ROSENBERG, PHILIP, and HOSKIN, F. C. G. Demonstration of increased permeability as a factor in the effect of acetylcholine on the electrical activity of venom-treated axons

1075 ROTHSTEIN, ASER. Interactions of arsenate with the phosphate-transporting system of yeast

1087 KOTAKA, SADAO. The L-amino acid oxidase from silkworm eggs (*Bombyx mori* L.)

1095 GIESE, A. C., MCCAW, B., and CORNELL, R. Retardation of division of three ciliates by intermittent and continuous ultraviolet radiations at different temperatures

1109 LUXORO, M., ROJAS, E., and WITTIG, E. Effect of azide and Ca ion on the reversible changes of protein configuration in stimulated nerves

NUMBER 6, JULY, 1963

1123 LOEWENSTEIN, WERNER R., and KANNO, YOSHINOBU. Some electrical properties of a nuclear membrane examined with a microelectrode

1141 KRAUSS, MARJORIE R., and MACLEOD, COLIN M. Intraspecies and interspecies transformation reactions in pneumococcus and streptococcus

1151 MILKMAN, ROGER. On the mechanism of some temperature effects on *Drosophila*

1171 RASMUSSEN, HOWARD, SCHWARTZ, IRVING L., YOUNG, RICHARD, and MARC-AURELE, JULIEN. Structural requirements for the action of neurohypophyseal hormones upon the isolated amphibian urinary bladder

1191 HURLBUT, WILLIAM P. Sodium fluxes in desheathed frog sciatic nerve

1223 HURLBUT, WILLIAM P. Potassium fluxes in desheathed frog sciatic nerve

1249 BARR, LLOYD, and ALPERN, MATHEW. Photosensitivity of the frog iris

1267 CONE, RICHARD A. Quantum relations of the rat electroretinogram

1287 DOWLING, JOHN E. Neural and photochemical mechanisms of visual adaptation in the rat

1303 WICKSON-GINZBURG, MARGARET, and SOLOMON, A. K. Electrolyte metabolism in HeLa cells

1317 INDEX TO VOLUME 46
